Fall Season, 1859. size of Whaleships are requested to have a Report made out on their arrival at the Islands, to be delivered to our Marine Reporter. Reports or journals of cruises in any part of the Pacific, addressed to the Publisher, will always be acceptable. Merchant or Whaleships arriving off Sandwich Islands Ports are interested to display the Suir's Signal.

The eighth census of the United States will be taken next year, and we may safely anticipate that it will show a rate of progress in population, civilization, production, manufactures and wealth far exceeding that of any prior decade in this country, and outstripping anything ever known in any other country. The last Legislature of Michigan passed an act empowering any number of citizens, not less than ten nor more than one hundred, to organize themselves into a body corporate "for the purpose of apprehending horse thieves and other felons," and investing each member of such body, when engaged in making an arrest, with the powers of a constable. Och'sk 150 1000 .... 600 2000 Arr at Lahaina Oct 24; sl'd fm Hon. The creditor had A large quantity of oil was scooped up from the river, docks and streets after the fire in New Bedford, one man saving 150 barrels. The referees chosen to decide what salvage should be allowed on this oil, awarded to the salvors three-fourths of the quantity saved by them. It sells generally for 25 cents per gallon. So the salvor of 150 barrels made nearly nine hundred dollars for hi day's work. The bad taste which for a time prevailed in the Croton water was owing to an extraordinary quantity of vegetable matter—a species of alge, or water-plant of a minute description, having suddenly become prevalent in the river. But the chemists say that, after experimenting, they are certain that, although slightly unpleasant to the taste and scent, this plant is in no manner unhealthy or injurious to the system. The water is more free from inorganic matter than ever before, although the difference is not material. Senator Douglas has written an article in the Sept. Harper's Monthly on "The Dividing Line between Federal and Local Authority—Popular Sovereignty in the Territories." It is an elaborate defense of his ideas upon the question of slavery in the territories. He contends, as he has always done, that Congress has no authority over the subject; but that it belongs exclusively to the people of the territories; and, as he has always done, he carefully avoids stating who constitute the people, and by what means their respective rights are to be determined. | 1856 N L | Arctic | 150 800 ... 200 3000 Arr at Honolulu, Oct 12; al'd 28th to croise and home | 1859 Hono | Arr at Hilo, Oct 7; sl'd fm Hon. the Atlantic Telegraph, it has been believed and publicly asserted by many, that no message was ever transmitted over the wires. There never could be any reasonable doubt of the fact, as many dispatches of importance were published, proving beyond cavil the existence of a communication. The New York Herald has just printed a diary containing all messages sent and received through the Atlantic cable during its working from the 10th August to the 1st of September, 1858, inclusive, by which it appears that there were sent from Valentia to Newfoundland 129 messages ambreoing 1474 words and foundland 129 messages, embracing 1474 words, and 7253 letters; and from Newfoundland to Valentia 271 messages, 2885 words and 13,968 letters. Certificates attesting the truth of the statements, made under oath, accompany the diary, which appears to 1858 N B Och'k .... 525 .... 400 5000 Arr at Hilo Oct 24; sl'd fm Hon Nov 15 

STEREOTYPING THE LONDON TIMES.—Mr. Strong, son of one of the proprietors of the Rochester Democrat, writes to that paper on account of his visit to the office of the London Times. "One of the most interesting and novel departments of the establishment is that in which the stereotyping process is carried on. You know, perhaps, already, that every number of the Times is printed from stereotype plates, thus saving a great part of the wear and tear of the type. The stereotype plate is taken from the "form" in three minutes, by a new process, invented by a Swiss, and known only to him. A thin layer of soft and damp papier mache first receives the impression of the type, and after it has been hardened by the application of heat, the melted lead is poured on which is to form the stereotype plate. The papier mache has the power of resisting the action of the melted lead, and comes out of the fiery trial uninjured, and almost unscorched. The plates are re-1957 Hono Och'k 15 1500 ... 500 6000 Arr at Honolulu Nov 13

The plates are re-melted every day after the issue of the day is printed from them, and the waste of type metal from day to day is very slight. By this power of multiplying the number of forms from which the same side of the paper can be printed, the *Times* can use three or four presses at once, and thus print its 59,000 copies,

Arctic 125 2300 ... 500 6000 Arr at Honolulu Nov 22 ; sl'd Nov 9 to cruise on an emergency, in two hours time." CIGAR MAKING MACHINE.—We have recently examined a most ingenious machine, the invention of Mr. Louis Beauche of Paris, for making cigars, Patents have been taken out in Europe and this country, as well as in some portions of South America and the tropies. At an examination of the machine at Madrid, made by royal order, the commission reported that it made 42 cigars in ten minutes, or 252 in one hour.

To show the value of such invention to this coun-To show the value of such invention to this country, we may state that in New York city alone there are about 200,000 smokers, each using two cigars per diem, which makes 400,000 cigars every day. These will cost for labor alone, at \$6 dollars a thousand, the enormous sum of \$8,760,000 annually, when make by hand, and the inventor calculates that his machine, which can be attended to by women and children, will produce them for \$1 per thousand, making a total cost for a year to the smokers of this city for labor, only \$1,460,000, or one-sixth the present amount.

From other States than our own we import annually, in this city alone, 12,000,000 pounds of tobacco, which is thus distributed: Connecticut, 10,000 cases of 400 pounds each; Pennsylvania, 5000 cases of 400 pounds each; Ohio, 10,000 cases 370 pounds each. From New York we receive 5000 cases of 400 pounds each; we also import 6,000,000 pounds from Havana, and a quantity from other Spanish ports, and we are told that on an average 20 pounds of tobacco are required for every 1000 cigars, and we can easily calculate that there are 900,000,000 cigars made in this city alone in one year.—Scientific American.
